Subject CAMU List

2058265 - R8 SDMS

As per our discussion....here is the list Jon N. and I put together several weeks

ago. CAMU material.doc

## Potential Material Going Into the CAMU

### **From the Sinter Plant:** - Built in 1930's

- Asbestos Transite Siding/Roofing (Burrito Wraps)
- Lead Residue and Dust
- Sinter in conveyor pans
- Plastic corrugated window material
- PVC piping
- Rubber hosing - 3/8" to 3" in diameter
- Hard plastic piping
- Lots of concrete with rebar
- Rubber belting from conveyors
- Idler arms (some non-metal)
- Lots of wood timbers and planking
- Glass in door panels
- Woolen blankets (Acoustical)
- Small amounts of light fixtures and electrical control boxes
- Brick
- Floor linoleum (non-ACM)

### **From the Acid Plant:** - Built in Mid-1970

- A lot of cinder blocks from the baghouse
- ACM - (Survey needs to be done)
- Lead Residue/Dust
- Highly corrosive iron sulfides <2pH
- Woolen bags
- Some concrete
- Wood planking
- Brick

### **Hot Cottrell Building (Part of Acid Plant)** – Built in Mid-1970

- ACM – (Survey need to be done)
- Lead bearing residue and dust
- Highly corrosive iron sulfides <2pH
- Harden reinforced plastic sheeting
- Large heavy concrete doors
- Lots of lime-rock
- Non-metal glass insulators
- Some glass doors
- Wood planking and timbers
- Some PVC and other harden plastics

**Blast Furnace Flue and Baghouse:**

- Tons of brick
- Lead Residue
- Sub-surface soils?
- Bags
- Wood
- Some glass

**Dross Plant:** - Structural upgraded in Mid-1990

- Lead Residue/Dust
- Lots of refractory furnace brick
- Lead
- Copper
- Spiess
- Huge concrete abutments
- Kettle setting brick
- Harden lead material from kettle floor
